

SYSPRO General Ledger

The General Ledger is the central repository for collecting and analyzing your business information, combining power and flexibility with ease of use, to give you the critical information you need to make timely and informed business decisions and manage your business more effectively. The system's extensive drill-down capabilities enable you to view everything from detailed journal entries to original source documents.

SYSPRO General Ledger produces the enterprise's financial statements including the Balance Sheet, which shows the enterprise's assets, liabilities and equity at a point in time, the Income Statement, which shows the enterprise's income, expenses and net profit over a period of time, the Cash Flow Statement which shows sources and applications of cash, and associated financial reports such as the Trial Balance. It facilitates the management of corporate performance and the monitoring of return on investment by providing complete enterprise-wide financial recording, analysis and reporting from all aspects of the business.

The General Ledger system is designed to be flexible and easy-to-use, allowing you to design financial reports in virtually any format and sequence. Reporting is simple, yet extensive by using the built-in Financial Report Writer, or by integrating to other best of breed financial reporting products. It supports unlimited history. The query is extensive with impressive graphic and drill-down capabilities. Up to 10 different budgets can be defined.

The General Ledger stores all values in local currency, but you can optionally have up to 10 alternative currencies within the General Ledger system for reporting purposes.

Other facilities in the SYSPRO General Ledger system are:

- Structured accounts to facilitate easier navigation, define relationships and analyze information
- Costs analysis which provides detailed analysis of the values distributed to accounts, without the need to create additional, unnecessary accounts in general Ledger.

The benefits of General Ledger

- Unlimited detail and summary histories for comparison reports, queries and graphs
- Unlimited structured or free-format account codes for evolving requirements
- Multi-currency, with currency exchange-rate history, for global organization requirements
- Sub-module integration in real-time or batch mode
- Sub-ledger drill-down for rapid identification of source transaction details
- Multiple general ledger journal types, including recurring journals
- Automatic balance transfer based on associated statistical account weighting
- Cost analysis to allow for detailed allocation to be recorded within an account
- Balancing reports for rapid identification of sub-ledger imbalances and their causes
- Standard financial-ratio queries, such as liquidity and profitability, for snapshots of company performance
- Consolidated financial reporting for multi-company requirements
- Option for authorization of journal functions for centralized control
- Multiple security options at account code level
- Granular security in structured general ledger for organizational divisions such as branches, cost centers and departments
- Financial year re-definition for evolving enterprises
- Support for global requirements such as European Monetary Unit (EMU) and FASB 52
